SUMMARY

MSc Applied AI graduate with an Electronics & Telecommunication background, seeking GenAI Engineer, AI/ML Engineer, or AI Solutions Engineer roles. Specializing in RAG pipelines, LLM evaluation, and cloud AI platforms. Proven in building scalable AI solutions with hands-on experience in agentic systems development.

EXPERIENCE

Freelance GenAI Developer | Nosana x ElizaOS Builders Challenge

- Architected a DeFi intelligence plugin for ElizaOS with 6 custom agent actions RSI, MACD, Fear & Greed Index, live prices, signal scoring, and top movers via CoinGecko and Alternative.me APIs at sub-200ms latency
- Built a 6-indicator multi-factor scoring engine generating autonomous BUY/SELL/HOLD signals across 100+ cryptocurrency pairs without manual intervention
- Containerized using Docker with single-command deployment; integrated into ElizaOS's action/provider architecture for zero-config agent setup

PROJECTS

AI-Powered Fake News Detection | (Capstone Dissertation)

- Developed CNN-based computer vision system using TensorFlow, achieving 98% detection accuracy (Precision: 97%, Recall: 98%, F1-Score: 97.5%)
- Implemented data preprocessing pipeline: image normalization, augmentation, and class balancing from 50,000+ synthetic images
- Optimized model inference latency from 250ms to 150ms through quantization and GPU optimization

Chat with PDF Notes System | RAG Pipeline

- Developed end-to-end Retrieval-Augmented Generation (RAG) pipeline: PDF ingestion, text chunking, embeddings generation using sentence-transformers, and vector indexing with FAISS
- Built semantic search engine handling 1000+ documents with sub-500ms query latency
- Engineered Flask REST API with request validation, error handling, and rate limiting; integrated with frontend using JSON payloads
- Containerized application using Docker; deployed on GCP App Engine with automatic scaling

EDUCATION

MSc Applied Artificial Intelligence and Data Analytics (First Class)

University of Bradford, UK

Sept 2024 - Sept 2025

BE. Electronics and Telecommunications (Distinction) GPA-7.76

AISSMS Institute of Information and Technology

Jan 2021 - June 2024

SKILLS

Languages	Python, JavaScript/TypeScript, C++, SQL, R
Tools/Frameworks	LangChain, LangGraph, Hugging Face, TensorFlow, PyTorch, Pandas, FAISS, ChromaDB, Docker, GCP, AWS, Flask, FastAPI, Playwright, Git, CI/CD, JIRA.
AI/ML	
Other Skills	RAG Pipelines, Prompt/Context Engineering, LLM Evaluation, Agentic AI, NLP, Computer Vision, Multi-Agent Systems, REST APIs, Project Management, Oracle Cloud

CERTIFICATIONS

Oracle Cloud Infrastructure Gen AI Professional | Kaggle Python Coder
AI & Agile (Scrum Alliance) | AI Ethics & Agile Project Leadership (Excellidia)

ACHIEVEMENTS

Open-source contributor to ElizaOS DeFi Oracle Agent plugin for Nosana x ElizaOS Challenge
Student Representative at University of Bradford
Top rank in Excellidia's AI Leadership program (50+ participants)
