SUMMARY

MSc Applied AI graduate with expertise in no-code/low-code, trading algorithms, and event leadership. Proven record in scalable tech projects and AI-driven solutions. AI & Data Analytics MSc graduate. Skilled in no-code/low-code, trading algorithms, and tech event leadership. Proven success in scalable solutions.

PROJECTS

Forest Fire Detection System

- Developed an AI-based system for early detection of forest fires using real-time sensor data and computer vision.
- Achieved 98% detection accuracy during testing across multiple simulated environments on synthetic data generated
- Reduced average response time to fire alerts by 40%, enabling faster intervention and minimizing risks.

AI-Powered Fake News Detection (Capstone Dissertation)

- Built a multilingual fake news classifier using BERT, achieving up to 95% accuracy across varied datasets and demonstrating strong results on English, code-mixed, and non-English news articles.
- Conducted comprehensive model interpretability analysis using SHAP, identifying and addressing bias in the model that improved fairness metrics by 10% across protected groups.
- Ensured robust performance and ethical standards with cross-lingual and bias testing, confirming the model’s reliability for practical misinformation detection and reducing unintended biases in predictions.

Real-Time Anomaly Detection in IoT Networks

- Built a machine learning framework for real-time anomaly detection in network traffic from IoT devices.
- Model identified abnormal patterns and potential security threats with 96% accuracy on test datasets.
- Improved network reliability by automating threat detection and alert systems.

EDUCATION

MSc Applied Artificial Intelligence and Data Analytics

University of Bradford, UK

Sept 2024 - Sept 2025

BE. Electronics and Telecommunications

AISSMS Institute of Information and Technology

Jan 2021 - June 2024

- GPA: 7.76

SKILLS

Languages	Python, Javascript
Tools/Frameworks	Transformers, TensorFlow, Pytorch, Pandas, Google AI Studio, Oracle cloude
Other Skills	User Research, Data Analysis, No-code/Low-code Development, Project Management, Prompt and Context Engineering, Gen AI, Machine Learning

CERTIFICATIONS

Kaggle Python Coder
AI & Agile (Scrum Alliance)
AI Ethics & Agile Project Leadership Programme (Excellidia)
Oracle Cloude Infrastructure Gen AI Professional

ACHIEVEMENTS

Student Representative at University of Bradford
Secured top rank in Excellidia’s Product Launch & AI Leadership program, recognized for innovative solution development and exceptional leadership among 50+ participants.
